# INDEX

JOURNAL OF THE BRITISH INTERPLANETARY SOCIETY
VOLUME TEN

A

Abstracts, 40, 86, 140, 221
Acceleration, and physiology, 154
Aero Club de France, medal, 324, 325
Aerodynamic
  braking, 258, 300, 302
  heating, at high speeds, 160, 259
Aerojet Engineering Corp., status, 82
Algae, as source of food and oxygen in spaceships, 155
Aluminium foil, use in spacesuit, 94
American Rocket Society
  co-operation with other societies, 3, 310, 318
  general, 322, 331
Ammonia, occurrence on planets, 64, 201, 207, 209
Air display at Hendon, 212, 213, 219
Areophysics, 229
Asociacion Española de Astronautica, 214, 322, 331
Associazione Italiana Razzi, 214, 322, 331
Astronautics
  advertising and, 139, 183
  B.B.C. and, 313, 330
  books and, 313
  cinema and, 148, 312
  Congresses
    first (Paris, 1950), 1
    second (London, 1951), 37, 138, 180, 194, 213, 237, 245, 318
    third, provisional arrangements, 323
  dimensionless parameters in, 210
  at Hendon Air Display, 213, 313
  Institute for, proposed, 146
  and mankind, 221
  press and, 39, 82, 139, 184, 215, 330
*l'Astronef*, 38
Astronomy
  books, 44, 91, 93, 229
  history of, 93
Atmophil, 56
Atmosphere(s)
  entry into, 26
  planetary, 197
  terrestrial
    structure, composition and properties, 18
    study of, methods, 19, 98
  upper, Grimminger's models, 24
Atomic power, application to rockets, 50, 154, 249
Aurora
  Earth's atmosphere studied by, 21
  on Venus, 205
Australia
  astronautics in, 139
  rocket range, 188, 189, 220

B

B.B.C. spaceflight programmes, 313, 330
B.E.R., 84
Ballistics, book, 189
Balloons, altitude range, 19
Base
  lunar, 49, 217
  orbital, advantages of, 50
Bell X.1 and X.2, 186, 216
Beryllium, as rocket propellant, 62
BIOGRAPHIES
  von Braun, W., 185
Biology
  and satellite vehicles, 301
  and spaceflight, 154
Boosters, recovery of, 238
Boron hydrides, preparation, 63

C

Canada
meteor crater found in, 83
wind tunnel, new hypersonic, 216
Canadian Rocket Society, 325, 331
Canavanine, 157
Carbon, possible occurrence on Moon, 63
Carbon Dioxide, utilisation of respiration product, 67
Chemosphere, for refuelling spaceships, 39
Chicago Rocket Society, 322, 331
Cleaver, A. V., medal presented to, 324, 325
Clouds
interstellar, 177
noctilucent, 20
Combustion in rocket motor, 123
CONGRESSES, INTERNATIONAL ASTRONAUTICAL
First (Paris, 1950), report on, 1
Second (London, 1951)
delegates to, 321
dinner, 328, 329
preliminary announcements, 37, 138, 180
report on, 318
souvenir postcards, 213, 332
technical sessions (symposium on satellite vehicles), 237, 245, 325
Third, provisional arrangements, 323
CORRESPONDENCE
Change of the Society's Name?
D. F. Martyn, 93
*Editorial*, 193
H. G. Wells,
E. Hope-Jones, 191
Lunar Spacesuit,
C. A. Cross, 94
H. E. Ross, 95
Meteors and Space Travel,
H. E. Ross, 45
Misplaced Credit,
P. E. Cleator, 234
A. C. Clarke, 234
Cosmic dust, and interstellar travel, 45
Cosmic rays, book, 89
Cosmology
book, 44
of Moon, 54

D

Dansk Selskap for Rumfarts-Forskning, 325, 331
Destination Moon, film, 149
Detroit Rocket Society, 322, 331
Deuterium, as propellant, 60
Dimensionless parameters in astronautics, 210
Douglas
"Skyrocket," 216
X.3, 186, 216
Drag-Canopy, for entry into atmosphere, 27
Duraluminium, penetration by meteors, 276, 284
Dust, interstellar, 45, 177

E

Earth
atmosphere, 18
density, 55
meteors striking, 278, 282
origin of, 229
structure of, theories, 55, 56
Editorials, 145, 193
Ehrenbuch der Astronautik, entries in, 183
Electrical power, generation of
for ion rocket, 252
on Moon, 66
for telemetering, 293
Ernst Heinkel Prize, 183
Erratum, 40
Exosphere, 19, 21
Expendable-tank construction, 107, 122, 287

F

FILM REVIEWS
Flying Saucer Mystery, The, 37
Films, and Astronautics, 148, 218
Fluorine, production, 65
Flying Saucers, 37, 220
Football pools, the B.I.S. and, 157, 234
Free fall, and physiology, 154, 158, 301

G

Gas, interstellar, 177
*Geochimica et Cosmochimica Acta*, 37
Germany
astronautical societies, amalgamation, 214
Congress (1952), provisional arrangements, 323
development of liquid-propellant rockets in, 75
rocket aeroplanes, development, 184
Gesellschaft für Weltraumforschung
Frankfurt (SW–G.f.W.), 331
Hamburg (NW–G.f.W.), 184, 322, 331
Stuttgart (SE–G.f.W.), 183, 322, 331
Goddard Memorial Exhibit, 85
Groupement Astronautique Française, 38, 322, 325, 331
Guided missiles, 186, 295

H

Heat transfer, at high speeds, 160, 260
Helium
on Moon, possible occurrence, 60
production and liquefaction, 60
Hendon Air Display, astronautical exhibit, 212, 213, 219

Hermann Oberth Medal, second award, 183
Hydrazine, as propellant, 240, 301
Hydrogen
on Moon, possible occurrence, 57
production and liquefaction, 59
Hydrogen Peroxide, propellant for rocket aircraft, 135

I

Injectors, propellant, 125
Institute for Astronautics, proposed, 146
INTERNATIONAL ASTRONAUTICAL FEDERATION
constitution, 323
draft constitution, 318
first task, institute for astronautics, 146
functions, discussed, 3
inauguration, 322
president elected, 323
International Congresses on Astronautics (*see* Congresses, International Astronautical)
Interplanetary Travel (*see also* Spaceflight) between satellite orbits, 249
Interstellar Travel, and meteors, 45
Ion Rocket, 247, 250
Ionosphere
composition, 21
definition, 19

J

*Journal of Atmospheric and Terrestrial Physics*, 37
Jupiter
atmosphere, 197, 207
possible living organisms on, 156

L

Landing
with parachute, 300
from satellite orbits, 258, 302
winged descent, 239, 254
Launching, of satellite vehicles, 254, 302
Life, on other planets, 156
Lithium
extraction, 62
as rocket propellant, 61
Lithophil, 56
Lunar Base, 49, 217

M

Magma, 56
Magnetism, terrestrial, in study of atmosphere, 20
Mars
atmosphere, 197, 205
book, 229
climate, 207
clouds on, 206
expedition to, 240
living organisms, on, 157, 207
MARS—contd.
polar caps, composition, 202
rocks, composition of, 202
waking sensation on, 155
volcanic eruptions on, 206
Medals, presentation of
A. V. Cleaver (Aero Club de France Medal), 324, 325
E. Sänger (Hermann Oberth Medal), 183
Meetings, recent and forthcoming, 47, 95, 144, 192, 234
Mercury (planet)
atmosphere, 159, 197, 203
markings on, 229
Mesons, 89
Messerschmidt aircraft, rocket-propelled, 185
Meteors and Meteorites
and composition of Moon, 54
crater, found in Canada, 83
hazard to spacestations, 275
interstellar, 176
metallic, 279, 282
Moon, impact on, 203
observations, 176
scarcity in geological ages, 157
showers, 282
space travel and, 45, 154, 176
statistics, 278
tracking 20
Middle East, astronautics in, 325
Mirror, construction in space, 80
Missiles, entry into atmosphere, 26
Model spaceship, at Brighton exhibition, 39
Moon
atmosphere, 198, 202
base on, 49, 217
composition, possible, 53
description, book, 229
as spaceport for Earth, 51
spacesuit for, 94
Museums,
Institute of Aeronautical Sciences, 85
Palais de la Découverte, 1, 182

N

Navigation, interplanetary, problems, 71
Neptune (planet)
atmosphere, 208
new satellite, 40
Nereid, 40
Netherlands, astronautics in, 325
Nord-West G.f.W. *See* Gesellschaft für Weltraumforschung, Hamburg.

effects of Space, 64, 155
Bumper Wac (*see under* Missile, guided)

C

Chemical reactions, computation of equilibrium composition and temperature, 245
Combustion chamber (*see under* Rocket motor)
Communication in space by light signals, 98
Computer (*see under* Missile, guided)
Cooling (*see under* Rocket motor, combustion chamber)
Cordite, anomalous rates of burning, 41
Cosmic radiation, health hazards in space, 15, 61

D

De Havilland Sprite, 32, 78
"Destination Moon," 49
Diborane, first and second explosion limits with oxygen, 68

F

Fuel (*see* propellant)

G

Gas
Composition, analog computer, 166
Sampling, use of cooled probe, 24
Gas generator (*see under* Rocket motor)
Guidance (*see under* V.2)
Gunpowder, flame photography, 44

H

Heat transfer (*see also* Rocket motor combustion chamber, cooling)
to Boiling water
with forced convection, 108
at high pressures, 164
Hydrazine
Catalytic decomposition, 157
Heat capacity of hydrazine-water system, 67
Mixtures as propellants, 119 P
Hydrogen
Liquid, with liquid oxygen, tests, 240
Thermal properties, 165
Hydrogen peroxide
Materials for use with 90 per cent, 105
Thermodynamic functions, 65
Hypersonic aerodynamics (*see* Super-aero dynamics)

I

Injector (*see under* Rocket motor)
Instrumentation (*see under* Rocket motor)
International Astronautical Congress, 107

L

Life (*see also* Body, human)
Silicon and extraterrestrial life forms, 62, 156
Lithium, as propellant, 121

M

Magnetic field (*see under* Atmosphere, upper)
Mars
Atmosphere
determination of pressure, 152
diffusing particles, 151
Geological interpretation of markings, 143
Structure and chemical composition, 146
Vegetation, 58
Mercury, atmosphere, 60
Metals, recent advances, 17
Meteor
Analogy with explosives, 141
Deceleration and ionizing efficiency, 150
Ionization due to, 57
Orbit of meteor of 3rd April, 1949, 145
Origin of Taurids, 144
Missile, guided (*see also* Aerobee; Projectile rocket; V.2; Viking)
Bumper-WAC, 20
Computer, performance, 75
General, 190, 191
German, 25
Radio control, 198
Tactical use, 72
Molecular aerodynamics (*see* Superaero-dynamics)
Moon
Determination of lunar parallax, 142
Eleventh report of lunar section of B.A.A., 53
Moon—contd.
Origin, 149
Preservation of archives, 161
Surface, 59

N

Navigation, interplanetary, 11, 14, 100, 102, 133
Nitric acid, white fuming and jet engine fuel (AN-F-58), 45
Nitric oxide, radiation from, 23
Nitrogen, high pressure, storage sphere, 162
Nitromethane, equilibrium of solution with water, 16
"Norton Sound," U.S.S., 69
Nozzle (*see also* Rocket motor, nozzle)
Expansion through, 76, 81, 83
Nuclear energy (*see under* Rocket motor)

O

Oil (*see under* Oxygen, liquid)
Oxygen, liquid
and Oil, performance estimates, 120
as Oxidant, 40

P

Peenemünde (*see under* Rocket motor)
Photography
High altitude, 163
16 mm. camera for rocket photography, 25
Planets (*see also* Atmosphere; Mars; Mercury; Venus)
Instability of small planetary cores, 136
Laws of planetary distances and revolution, 135
Minor, 54, 55
Origin of planets and satellites, 139
Photocentric effect of radial retardation, 137
Relation with white dwarfs, 138
Projectile, means for cooling, 183 P
Projectile, rocket (*see also* Missile, guided)
Air-brakes for, 29
Aircraft, 28
Anti-aircraft, 192
Early German, 114
Escape, 35, 74
Flare, 158 P
General, 126, 189, 193, 194
Launcher, 168 P, 180 P
Orientation, photographic determination, 184
Solid, 170 P, 171 P, 172 P, 173 P, 174 P, 175 P, 178 P, 181 P, 182 P
aircraft, mounting, 176 P
effect of jet misalignment, 85
Step, nomogram for performance, 167
Target, 169 P
Trajectory, 70, 109
measurement, 30

Propellant (see also Cordite; Gunpowder; Hydrazine; Hydrogen; Hydrogen peroxide; Lithium; Nitric acid; Nitromethane; Oxygen, liquid; Rocket motor, nuclear energy)
of the Future, 122
General, 43, 88, 242, 244
Handling hazards, 246
Heat capacities, 66
Performance
effect of reassociation, 81
evaluation, 89, 245
Solid
combustion, 42
effect of pressure, 90
strip, 243
Pump (*see* Rocket motor, turbo-pump)

R

Radar for determining projectile trajectories, 30
Radiation (*see* Nitric oxide)
Radio control (*see under* Missile guided)
Rocket motor (*see also* Gas; Nozzle, expansion through; Thrust augmentation)
Actuated by successive detonating charges 220 P
Beta, 39
Combustion chamber
cooling, 38, 235 P
sweat, 22
energy loading, 84
flow stability, 33, 239
heat transfer parameters, 117
ignition apparatus, 204 P
intermittent feed, 234 P
mixing partition, 216 P
rotating, 236 P
auxiliary vanes, 206 P
fuel feed, 224 P
and cooling, 226 P, 233 P
gas take-off, 231 P, 232 P
propellant feeding means, 221 P, 222 P
successive, 237 P
with target area, 215 P
De Havilland "Sprite," 32, 78
Flight testing, 82
Gas generator, 200 P
General, 101
HWK 109–509, 31
Ignition, 227 P
Injector, ring-valve, 223 P, 225 P
Instrumentation, pressure pick-up, 199 P
Liquid-propellant, 213 P, 228 P
Microrocket, 37
Monopropellant, 207 P
Nozzle, rotatable, 214 P
Nuclear energy, application, 208
Production problems, 34
Propellant
control, 202 P, 227 P
pumping equipment for cold liquids, 203 P
Rocket Motor—contd.
Solid
cooling means, 229 P
jet-adjustment, 210 P
multiple, 218 P
prevention of excessive pressure, 205 P
relief means, 219 P
side-venting, 217 P
trap, 201 P, 209 P, 211 P
Tank, 212 P
Thrust measurement, 118
Turbopump, 36, 241
starting and control, 230 P
Rocket post, 19
Rocket propulsion
General, 80
Historical, 71, 238
Limitations, 10

S

Satellite, artificial
Design project, 128
General, 47, 129, 130, 131, 132
Solar system, origin, 140
Spaceflight (*see also* Navigation, interplanetary)
Dynamics, 12, 51, 104
General, 5, 6, 8, 10, 13, 50, 80, 93, 94, 95, 96, 97, 99, 101, 126, 127, 129, 132
Pioneers, 106
Relativity effects, 9
Societies, 49
Space medicine (*see* Body, human)
Spaceship
Cabin design, 7
Electric, 52, 103
Space station (*see* Satellite, artificial)
Superaerodynamics
General, 2
Lift on inclined bodies of revolution, 3
Supersonic aerodynamics, 1

T

Telemetry, 197
Thrust augmentation, 115
Tsiolkovskii, Konstantin Eduardovitch, 159, 160

V

V.2
General, 26
Guidance system, 110, 195, 196
Venus, application of compressibility-pressure model, 134
Viking
General, 112, 185, 186, 187, 188
Ship firing, 111, 177
Vibration, 179
